

UPDATE YOUR PROFILE

1) Update Your User Profile for Searching

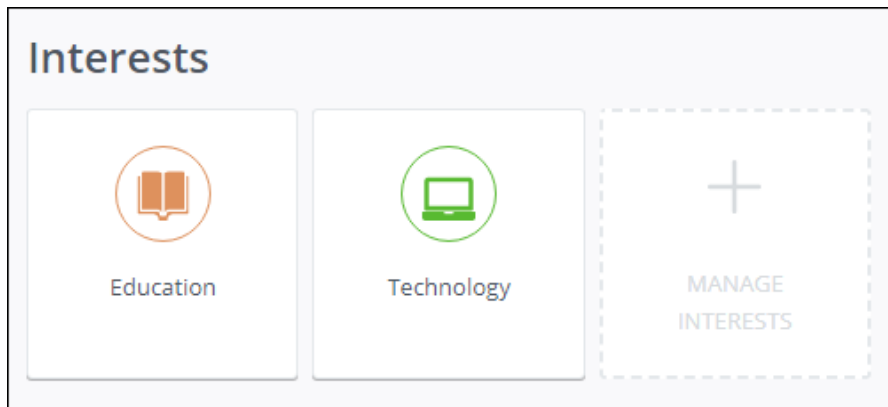

You can specify your volunteer interests in your user profile. Once you've done that, your Connect site can match you to new needs as they are posted on the site. You can learn about these needs in a couple of ways:

- Your Volunteer Dashboard includes a "Suggested Needs" area that lists the most recently updated needs that match your interests.
- You'll receive a weekly email informing you of new needs in your interest area that have been posted in the past week. This email also includes information about any need posted by your fanned agencies.

To update your interests (as well as your preferred causes and fanned agencies), click your profile dropdown (located in the top right-hand corner of your Connect site screen) and select **View Profile**.

Select the causes (which will match you up with agencies), interests (which will match you up with needs), and agencies you're passionate about. To view your options, click the + icon. In the example below, the volunteer has selected Education and Technology as interests.

This volunteer's **Dashboard** will now show the most recent needs that are associated with education and technology, and they will receive an email weekly informing them of any new opportunities in education or technology that have been posted,
